Pisum sativum mechanism of growth picolitre osmometry 1325
Water potential isotherms
Echinocereus engelmannii Ferocactus acanthodes Opuntia basilaris Opuntia acanthocarpa 641
Water relations
Cucumis sativus ferulic acid allelopathy ion uptake 649
Anthurium bredemeyeri epiphyte anatomy 723
Acer pseudoplatanus stomatal conductance cavitation root growth 1591
Water shortage
root growth paclobutrazol pea *Pisum sativum* 1367
Water storage
dielectric constant *Sabal palmetto* time-domain reflectometry stem capacitance 111
Water stress
photosynthesis productivity leaf cells genotype 1001
metaxylem vessels tropical maize 1015
Sorghum bicolor cell membrane stability leaf water relations osmotic adjustment 1569
Water uptake
root disease *Phytophthora cinnamomi* soil–root interface computer-assisted tomography 121
Wheat
SO_2 fumigation SH-compounds 797
development modelling ideotypes 1147
Wheat improvement
Triticum dicoccoides wild emmer wheat salt tolerance ^{22}Na uptake 511
White clover
tall fescue selenium assimilation selenium exclusion tolerance nutrient uptake 549
Wild emmer wheat
Triticum dicoccoides salt tolerance ^{22}Na-uptake wheat improvement 511
Wild rice
Zizania palustris var. *interior* seed germination dormancy desiccation tolerance moisture content recalcitrant temperature 747
Wild type
Phaseolus vulgaris Rhizobium mutant backcross 843
Woody species
transformation *Agrobacterium* direct gene transfer 1181
Wounding
ion flux electric current calcium potassium 1251
X-ray microanalysis
antimonate procedure *Avena sativa* Ca^{2+} localization phytochrome 439
Xylem
Picea abies sulphur nutrition glutathione long-distance transport seasonal changes phloem 1243
Xylem characteristics
rice *Oryza sativa* roots drought resistance 925
Xylem exudate
nutrient translocation root zone temperature shoot demand nutrient circulation 537
Xylem sap
absisic acid calcium ionic fluxes 1315
Xylem transport
Ricinus communis leaf development phloem transport carbon nitrogen nitrate reduced nitrogen nitrate reduction partitioning 393

Lupinus albus salt stress phloem transport partitioning carbon nitrogen K^+ Na^+ Cl^- 777
Xylem vessels
drought root age water flow 1441
Xyloglucan
cell wall turnover sloughing wall assembly 463
Yield
Oryza sativa CO_2 temperature yield 959
Zea mays
vitamin K_3 dicumarol plasmalemma redox system membrane potential 175
vitamin K_3 dicumarol plasmalemma redox system proton pump 183
maize germination vivipary desiccation abscisic acid 759
calcium growth salinity sodium 857
Fast Green-stainable basic nuclear proteins cell size DNA content nuclear chromatin structure rDNA transcription 991
leaf water relations leaf rolling osmotic adjustment stomatal conductance water deficit 1451
Zizania palustris var. *interior*
wild rice seed germination dormancy moisture content desiccation tolerance recalcitrant temperature 747
